BIGGEST ROTARY LADIES' NIGHT

Part Ridiculous, Part Sublime, Plenty Of Fun All The Time—Former President Stull's Last Meeting.

Women who could and did keep a secret, thereby exciting an acute curiosity on the part of their husbands, caused the largest attendance on Wednesday evening ever gathered at a Rotary Club ladies' night in Kingston, more than 100 Rotarians and Rotarianettes gathering in the Eagle Hotel dining room and enjoying a dinner that in quantity, quality and service set a new high record for the ancient hostelry. Besides the usual singing there was a special rendition of "Lulu" by a quartet of which Doctors Chandler, O'Meara and Johnston were members, thus ensuring the proper professional treatment of this great hymn of sentiment and surgery. John Gregory, proprietor of "Lulu," was, of course the fourth member of this quartet. Another special musical feature was the singing by C. R. Stull of his highly educational at Sunday school song, which illuminates not only the field of theology but that of national history as well.

This being Mr. Stull's last meeting with Kingston Rotary Club, as his home is now in Philadelphia, where he is connected with the American Gas Company, the club's regret at his departure was expressed by the Rev. Dr. Seeley in an address in which he reviewed briefly Mr. Stull's services to the community through Rotary activity and in the various war drives and other community movements.

Mr. Stull, who is a former president of the Rotary Club, expressed his regret at breaking off the pleasant associations formed in Kingston and promised to return and renew them from time to time.

Official figures of the attendance contest showed the following percentages:

Team No. 1	96¼
Team No. 2	98⅝
Team No. 3	77⅝
Team No. 4	87½
Team No. 5	93⅞

The winners and their wives are to dine gratis at the expense of the losers and are unanimously in favor of an elaborate and expensive banquet.

Comparatively trivial matters disposed of, came the serious business of the evening—the production of the entertainment planned in secret by the ladies, who had entire charge of the program. This took the form of an exhibition by the "Rotary District School for Girls, Miss Mattie Chandler, teacher." Miss Mattie was the personification of the prunes and prisms type of exceedingly serious and precise old maid school teacher and her class was a delight. The full program follows:

9. Full Chorus—"Burning of Kingston in 1777".....By the School

Reception by the Board of Trustees, Pupils and Teacher.

While awaiting the distinguished visitors, the school went through a series of physical exercises in which it displayed amazing celerity.

Coroner Chandler, in a plug hat of the type that used to be known as a "Greeley Hat," and a black moustache that made him look like a "busted" Tammany politician, gave a perfect impersonation of a small official of the earnest and solemnly asinine type, laboriously delivering a speech without having anything to say. His topic was "How doth the little busy bee improve each shining hour," and the great lesson was that the bee "doth;" therefore, go thou and do likewise—be sure you "doth." Deacon Gregory, in profuse and ornate whiskers, examined the pupils and from their replies elicited the fact, among many others, that Canada is noted for hooch and bridal tourists from Kingston. Mrs. Watts interrupted and criticised, in perfect imitation of the aimless busybody whose best exercise are devoted to meddling with school affairs.

The recitations and songs by the pupils were as tenderly sentimental as "Lulu" or as tragic as the fate of "the gol-darned spider" when the rain came down. The movie scenario was most touching, picturing the adventures of Aigie and the bear. Filial devotion was never more convincingly taught or more tenderly pleaded for than in "Don't Swat Your Mother, Boys," which was a musical marvel as well, and in "I Wish I Was an Egg" height of devotion and self-sacrifice was reached that brought tears to every eye.

To Do Electrical Contract.

Joseph A. McNeils & Co. of this city have been awarded the contract for the electrical work for the new Kingston-Rondout store.

SPINNEWEBER'S PERMIT DELAYED

A hearing was held Wednesday afternoon at the court house before H. A. Mintz, counsel for the Public Service Commission, on the application of Fred J. Spinneweber of Port Ewen for a certificate of public necessity to operate an automobile bus line over the Rondout Creek bridge between Port Ewen and Kingston.

DuBois Gillette appeared for Mr. Spinneweber and Henry McKenzie appeared for a number of the taxi drivers. At the conclusion of the hearing decision was reserved until counsel for petitioner furnished the commission with facts as to when the bridge would be opened by the State Highway Commission to traffic.

Schipp's bus line, operating between High Falls and Kingston, was represented at the hearing but did not oppose the application. Town Commissioner of Highways Rodman appeared for the town of Esopus.

Applicant is allowed thirty days after the granting of the application in which to begin operation of a bus line and permission consequently can not be granted Mr. Spinneweber until the commission is informed as to when the bridge will be opened to traffic.

The public exercises and official opening of the bridge will take place on November 29, as announced in last night's Freeman.

YOUNG TURK IS STRONG FOR IRWIN

This morning a Freeman reporter asked a former member of the Young Turks, the organization that made Roscoe Irwin mayor of Kingston, what he thought of Irwin's candidacy for the Supreme Court judgeship. He emphasized particularly the bigness of Irwin for the job. "No one can deny, said the Young Turk, "that Irwin's bigness came through his own efforts after an organization had been turned over to him through the hard work of the fellows who made him mayor. To prove his bigness did not Irwin fail to mention anyone but himself and some carpetbaggers for jobs? And did anything go his way? If my memory serves me just a trifle, I recall that both Governors Dix and Sulzer were kind to him; New York city was more than beneficent with its commission in his behalf, and I failed to see that the local newspapers were ever given the opportunity to announce his resignation as a commissioner for New York during his incumbency as internal revenue collector, which the Federal government so kindly bestowed on him.

"The poor old Democratic donkey in Ulster county has been kicked so badly that it fails to draw a wagon with votes in it, but the mule's tail and ears are up when it is hitched to the wagon containing the organization, as the load is not heavy enough to make it balk.

"The Democrats of Ulster should consider it a rare moment in their lives to be privileged on election day to deposit their ballots for one who has done so much for himself, thereby cementing their loyalty in unstinted terms, and in doing so what a privilege it will be for them to imitate the Hudson Valley Volunteer Fireman's Association, whose biggest vote is cast in Poughkeepsie, Nyack and Haverstraw."

WILL HISTORY REPEAT.

Democrat Wants To Know About Prospect For Rowers.

Kingston, N. Y.
Nov. 2, 1921.

Editor Freeman:

Now that the candidacy of Mr. Roscoe Irwin has been unqualifiedly endorsed by that noted Republican, and that equally well known Democrat, respectively, the Hon. Ira Britt and the Hon. James A. Betts, may I not ask before all us Democrats fall into line, whether there will be a right and a left bower at the conclusion of the campaign?

MARKET DID $75,000 BUSINESS

According to Estimate Made by Commissioner Moyle, Who Was in Charge—Market Opened July 19, and Closed November 1—Its Advantages.

William Moyle, commissioner of public markets, who had charge of Kingston's first public market which opened on Field Court on July 19, of this year, and closed November 1, when seen today stated that the market had proven a success. He estimated that $75,000 worth of business had been transacted at the market during the summer months. This will give an idea of the large amount of business carried on at the market during its infancy.

Commissioner Moyle said that the advantage to the producers were many. The transactions at the market were for cash, which eliminated bad accounts or inconvenience because of delayed payments for produce. The producer also secured higher prices, on an average, than he could have obtained by selling to the commission men.

The market offered an opportunity for selling small quantities of produce which the large wholesale dealers do not care to bother with. Perishable products which while still wholesome but too ripe to go through ordinary channels, were sold at the market direct to the customer, thus saving what might have proven an entire loss.

The market also afforded the farmer an opportunity to build up and establish a reputation on a brand of goods, an opportunity which he would be unable to obtain otherwise. Another advantage was that the producers and consumers had the opportunity of meeting and placing orders for considerable quantities. Orders were placed a week in advance on certain products. The farmer also becomes acquainted with what produce is sold readily. As time was valuable to the producer, it afforded him an opportunity to sell out early and return home.

The advantages to the buyers at the market were also many. The produce sold came direct from nearby farms to the market every morning and was fresh and of better quality. The buyer who desired to purchase for special purposes was given the opportunity to place orders with some of the producers, who supplied them without delay.

The market also gave the buyer the chance to compare goods and prices which the buyer at a store would not be able to do. The buyer was also able to obtain bargains where the quantity of produce was small and the producer was anxious to sell out and return home early.

Commissioner Moyle said that it had been of great assistance to the market in having The Freeman daily print the market quotations. He said that he also appreciated the support given the market by the producers which had made it the success it had proven to be.

LABOR RESTIVE IN MEXICO

By Telegraph to The Freeman.

Mexico City, Nov. 3.—Labor leaders today threatened to attempt to bring about a general strike to compel government action in behalf of the working class, particularly the unemployed.

Ten thousand laborers at Puebla attended a mass meeting and voted in favor of a national strike.

There is much unrest in the Tampico oil fields as the result of unemployment and the continued discharge of workers by foreign oil companies.

It is estimated that there are 50,000 workers idle in the southern states. The government plans new highway construction and harbor improvements to give work to thousands of idle men during the winter.

DR. OAKLEY PREACHES

In Middletown Church He Built In 1871.

The Rev. Dr. John Greenleaf Oakley of Tuckahoe, for over fifty-eight years in the active ministry, delivered the sermon at St. Paul's Methodist Episcopal Church at Middletown Sunday in the building which was erected under his direction in 1871. In that year he laid the first brick and the last one, and subscribed the first dollar toward the erection and the last one.

Twelve of the original members of the church were present in the large congregation which listened to Dr. Oakley Sunday. All the bishops of the Methodist Church in office at the time of his pastorate in Middletown have died, and not a president or ruler of any country in the world then in office is living today.

Dr. Oakley is father-in-law of Mrs. T. H. Paraguenath of this city, where he is well known. His first charge was Eddyville. He is still the active pastor of a growing church.

Legion Buys Church.

Announcement is made that the old Baptist Church in Medalia has been purchased by the Harris-Smith Post of the American Legion, and will be used as headquarters after the building has been remodeled to make it suitable for its new use. The church has been unoccupied as a place of worship for nearly twenty years, having been closed on account of a lack of sufficient congregation to keep it running.

DR. LEEPER HAS PARALYTIC STROKE

Tongue And Right Hand Especially Affected But Hope Is Held In Roanoke That He Will In Time Recover Use Of Both.

Some time ago the Rev. Dr. Leeper, former pastor of the First Dutch Reformed Church, who with Mrs. Leeper left town three weeks ago for Roanoke to take up the pastorate of the Second Presbyterian Church there, suffered a stroke of paralysis. The Roanoke Times of Sunday, October 23, says:

Dr. J. L. Leeper, who came to Roanoke to assume the active pastorate of the Second Presbyterian Church for some months and who was taken so suddenly ill some days ago with a paralytic stroke, is convalescing in an encouraging manner under the able care of Drs. Powell and Brown and will in some time acquire entire control of the use of his tongue and his right hand, both of which were so sensibly affected.

Much has been expected of Dr. Leeper's ministry in the Second Church and great was the disappointment when the calamity befell Dr. Leeper. A cordial reception had been planned by the ladies. The second Sunday service was to have been supplanted by a Community Service at half past four o'clock, Sunday afternoon, which was to have been made attractive by special music, and large audiences were anticipated as doubtless there would have been. The highest anticipation were entertained for the winter's work.

It has been the plan of Dr. and Mrs. Leeper to spend their winters in the service of some church in the southland and to retire to their home at Kingston, on the Hudson, during the summer. So greatly have the people of the Second Church endeared themselves to them in their sore trial that they have decided to remain amongst them to enjoy further their fellowship and the beautiful surroundings of Roanoke. They will remain in their apartment, 810 Roanoke street, selected for them by the church.

STRIKE CAUSES POOLERS NO LOSS

Within a few hours after the walkout of more than 10,000 milk wagon drivers in New York city the Dairymen's League Cooperative Association had arranged to take care of practically all of its members' milk which had been refused at the dealers' stations because of the strike.

On the morning of November 1st farmers took their milk to hundreds of milk shipping stations belonging to Bordens, Sheffield Farms, and others and the milk was refused. The Cooperative Association, because of its good organization, soon arranged to have the milk delivered by the farmers, or in trucks, to one of its own ninety odd stations or to the plants of the other manufacturing dealers not dependent upon New York city for their market. Thus both the pooler and the non-pooler dairyman had brought home to him forcibly the fact that the Cooperative Association was what it had always claimed to be, an insurance to its members of a regular and permanent market for their milk.

For several months the non-poolers at the fluid stations have boasted of receiving higher prices than the poolers for the milk. But on the morning of November 1st there was a different story to tell. There were hundreds of non-poolers who had to take their milk back home and make it up at a great loss, while practically all those who belonged to the organization were taken care of and will receive the pooled price for their November milk just the same as if they had delivered to the dealer in the regular way.

"Romeo" Keyes Again Wifeless.

By Telegraph to The Freeman.

Boston, Nov. 3.—John Baker "Romeo" Keyes, millionaire Cincinnatian, yesterday secured an annulment of his marriage to Miss Florence Giradin, former Harvard club elevator operator, whom he married after a courtship featured by no little publicity. In announcing the annulment decree, Judge W. A. Burns declared he found Keyes was insane at the time of his marriage and for this reason the ceremony was null and void.

Seek Lower Gas Rate.

Another reduction in gas rates will be attempted by the Central Hudson Gas & Electric Company in Poughkeepsie. Even a reduction must be approved by the public service commission. The last attempt was made in 1921, but the new schedule contained a service charge of forty cents and the whole new rate was denied approval by the commission.

FARM BUREAU MEMBERS SIGN UP

The Farm Bureau membership campaign is now in full swing with 75 per cent of the old members renewing their membership at the increased fee of $5.00.

The six canvassers have turned in 148 memberships as the result of the first two days work. Team No. 1, composed of H. M. Eppes and M. H. LLOYD-GEORGE AND CRAIG TO MEET

Big Effort To Placate Ulster Tomorrow—Plebiscite Probable In Disputed Counties.

By Telegraph to The Freeman.

London, Nov. 3.—A supreme effort to establish the ground work of an Irish peace settlement will be made here tomorrow when Sir. James Craig, premier of Ulster and leader of the Ulster Unionists, will confer with Premier Lloyd-George. Sir James also will consult with Sir. Edward Carson, former leader of the Ulster Unionists, who has been acting as mediator between the British government and the North Ireland Tories.

The Irish peace negotiations virtually marked time today. The cabinet met and canvassed the situation after which it was semi-officially announced at the office of Sir Hamar Greenwood, chief secretary for Ireland, that the outlook did not appear so bright as it was yesterday due to the stiffening of opposition in Ulster.

It was denied in Downing street circles that the government has sent a formal note to the Ulster government at Belfast but it was admitted that there had been communication on the subject of a plebiscite in Tyrone and Fermanagh counties.

From Sinn Fein sources it is learned that the Sinn Fein have agreed to a settlement upon the following basis.

1.—Dominion status for Ireland.

2.—Ireland will own allegiance to the king on condition that the country is a unit and not divided in autonomy with co-ordinated parliaments in Dublin and Belfast.

3.—Tyrone and Fermanagh counties and part of Donegal county shall be detached from Ulster province.

There is every ground for belief that the Sinn Fein has consented to give up its demand for an Irish republic on condition her other requests are granted.

Sir James Craig will leave Belfast tonight arriving in London tomorrow morning. It is understood that Premier Lloyd-George will make formal proposal tomorrow that a plebiscite be held in Fermanagh and Tyrone counties.

Injury at Binnewater on Sunday, Caused by Frightened Horse, May Prove to Be Fatal.

Mr. and Mrs. J. E. Nichols, of Cottekill, met with a serious accident on Sunday afternoon, while driving on the highway between the Beache's crossing and Binnewater, where the railroad parallels the highway for some distance. Their horse became frightened and backed the carriage in which they were seated against a passing freight train. The carriage was demolished, and they were thrown under the wreckage. The train stopped, and Mr. and Mrs. Nichols were pulled from beneath the wreck alive, but badly bruised. Mrs. Nichols is in bed, unable to move her right side, while Mr. Nichols manages to hobble around. He says its a miracle that they were not killed.

LANDIS HOLDS UP REBELS' MONEY

World Series Checks Of Ruth, Meusel And Piercy, $3,263.26 Each Are Withheld Pending Settlement Of Rule Dispute.

By Telegraph to The Freeman.

Chicago, Nov. 3.—The world's series money of Babe Ruth, Bob Meusel and Bill Piercy, New York Yanks, who violated the rules of organized baseball by taking part in a post season barnstorming tour, has been held up on orders of Judge K. M. Landis. The check for each amounts to $3,263.26.

This is Landis's "ace in the hole" in his differences with Babe Ruth over the question and is said to be one of he reasons why the baseball commissioner has been unusually slow in making a decision in the case of Ruth, Meusel and Piercy.

The situation as far as the ball players are concerned was not helped by the statement of Meusel in Chicago the other day to the effect that Judge Landis "can jump in the lake."

MILK DEALERS WON'T ARBITRATE

By Telegraph to The Freeman.

New York, Nov. 3.—Despite acceptance by the 12,000 striking milk wagon drivers of Mayor Hylan's terms of mediation, distributors of milk served notice today of their intention of waging a finish fight for the "open shop."

The New York Milk Conference board notified Dr Copeland that they could not accept arbitration.

Widely scattered outbreaks of violance were reported. Distributors declared the issue has been clearly drawn, and that the strike means either the death of the union or ruin of the distributors.

Distributors have maintained their hospital delivery service at nearly normal thus far, and families have obtained supplies at the various milk depots throughout the city.

Distributors continued employing strikebreakers on delivery wagons.

Daddy's Evening Fairy Tale

MARY GRAHAM BONNER

IN THE ZOO.

"Not only," said the Buffalo Leader, "are there real buffaloes in this zoo, but in this park there are statues of buffaloes.

"Statues are made to look like real people who have been famous, and so when they have statues of buffaloes it means that buffaloes have been famous.

"They have these statues near our part of the park, too."

"They have statues of us," said the Lion.

"Some of them are outside of our building," said the Lioness.

"There are at least two there," added the Lion. "Roar, roar, there are at least two."

"How many animals there are in the park," said the Rocky Mountain Sheep. "Yes, this is a big zoo park, very big zoo park. And it is so beautiful, too.

"There are members of the Zebra family and of the different Deer families here, and some of the Japanese Deer family. Old Mr. Hippo and his brother is here.

"There are two fine big Bactrian Camels here. They are proud, indeed, of their two humps. Each one has two humps. And they say that is the way of their family.

"There are Mute Swans and Trumpeters, and they have a beautiful time swimming about among the leaves in the water. The leaves are beginning to fall, you see," ended the Rocky Mountain Sheep.

"I see," said his mate. "The leaves are beginning to fall because it is fall," she added. "That's a joke."

"Oh, very well," said his mate, "I'll think up a better joke next time. What other animals are here in this park zoo?"

"There are many turtles and crocodiles, giraffes and oh, so many, many buffaloes.

"There are plants and trees, too, of interest in the park.

"I heard some people in the zoo talk of a sight-seeing trip they had taken and they had gone out into the country to see some of the wonderful old sights about. And they had seen chickens and hens wherever they had gone!

"There is the Orang-Utan in the zoo who is a great favorite. The children love him. He came from Borneo, which is many, many miles away, across an ocean or so, and all that sort of thing."

"What do you mean by 'all that sort of thing?'" asked his mate. "Do tell me."

"I don't know much about geography," said the Rocky Mountain Sheep, "except where I came from, and so I end off my sentence like that, with just a wave of the foot, to pass off what I don't know."

"I see," said his mate. "But you seem to know a lot about the creatures here in the zoo."

"Yes," said the Rocky Mountain Sheep, "and I listen to what is be-

"A Wave of the Foot.

ing said. One can become very wise, I've heard, by paying attention."

"Do you want to become very wise?" asked his mate.

"Oh, I might as well," said the Rocky Mountain Sheep, "as long as I don't have to pay anything extra for it."

"But you don't have to pay for anything," his mate said, "so why do you speak of something which you don't have to pay anything extra for?"

"Just a way I have of talking," said the Rocky Mountain Sheep.

"I will tell you more that I've heard about the Orang-Utan. He used to live in a nest-like platform in a tree where he could rest and sleep and enjoy life.

"He used to live on fruit, mainly, and maybe he still does, for all I know. I've never been in the monkey house, though I've heard of the business he has taken and of how he has teased some of the children who've come to visit him by throwing the skins of the bananas at them!

"That's a real joke, now, Mrs. Rocky Mountain Sheep.

"He used to live with his family over there, and other families used to live in the tree tops, too. Though sometimes an Orang-Utan is quite happy to be alone."

"You've certain told me a lot," said Mrs. Rocky Mountain Sheep. "You must certainly have given me a great deal of information. And though I may never use my knowledge it is pleasant to feel that I have it tucked away in my Rocky Mountain Sheep head!"

First Safety Razor.

The first safety razor was merely an ordinary straight razor with a detachable guard. It was made by Michael Kaiser, of Sheffield, in 1828. Known with removable blades were first introduced until some time soon.

ACCORD.

Accord, Nov. 3.—The installation of the Rev. Leonard M. Braam as pastor of the Reformed Church, took place Monday afternoon, was very largely attended. The service was very beautiful and impressive. The messages delivered by the out of town clergymen were all exceptionally good. With every member supporting the church and its new pastor to the very best of their ability, Mr. Braam's pastorate cannot help being highly successful.

There will be no community sing November 7. The date will be announced later.

Ulster County Voters Support a Resident of Your County

Vote For ROSCOE IRWIN

For Justice of the Supreme Court

Former Collector of Internal Revenue.

Voters of Ulster County without reference to political affiliations ought to support Mr. Irwin, a home man. He has resided in Ulster County for thirty-three years and there isn't a candidate from Ulster County running against him. In addition, the judiciary is considered non-partisan in character and party lines are not drawn so closely in voting for Justices of the Supreme Court.

Mr. Irwin's record is his platform and he has faithfully performed his duty in every public office held by him. As the Knickerbocker Press said editorially when Mr. Irwin resigned as Collector of Internal Revenue: "Roscoe Irwin, the retiring Collector, won for himself a flattering reputation in office. His efficiency, and especially his courtesy and his consideration, enforcing the laws in a manner that was ever kindly, even though firm, made him as well liked as he was widely known * * * Business men and the public in general will know how to appreciate such wise and skillful service as is afforded by this office."

The exact accounting of hundreds of millions of dollars supervised by Mr. Irwin was certified by expert Government auditors from President Harding's Administration who stated: "It is a great pleasure to report that the Albany office is in excellent condition. The stamps and lists are in perfect balance. * * * Former Collector Irwin's active and personal attention to the affairs of the office, made the prevailing condition possible."

Voters of Ulster County ought to feel proud in having such a candidate and should give him undivided support on Election Day.

You will find his name FOURTH in Section 2 on the official ballot.

FREEMAN WANT ADS. BRING RESULTS

IN COAT DRESSES

Garments Are Made to Give Youthful Appearance.

Embroideries Are Given Much Emphasis—Braid Favorite Means of Embellishment.

Coat dresses which are invested with youthful qualities are conspicuous, with the straight-line frock developed along chemise lines also sponsored. Further diversity is expressed in the model which features the pouched bodice and straight skirt, while a frock which stands out distinctly for its individuality affects princess lines.

Gold thread and floss embroideries are given considerable emphasis, with braid a favorite means of embellishment, novelty braids as well as the well liked military braid being accorded attention.

A coat dress of twill having a straightline back is unusual for the distinct bodice section, which appears at the front only. The side closing is marked with gold thread embroideries, which also stretch in band formation aro[illegible] lower skirt edge. A sufficient [illegible] is introduced to give a

Suit of Twill Embroidered in Black Silk.

youthful swing to the garment. Another coat frock also affecting a side closing, is adorned in an interesting manner with braid which takes on a pointed outline. A tiny watch pocket adds a naive touch.

NIGHTGOWNS FOR THE BRIDE

Exquisite Creations Have Not Suggestion of Lace or Hand Embroidery; Drawn Thread Used.

Exquisite nightgowns for the fall bride have not a suggestion of lace or hand embroidery but are ornamented with drawn thread patterns. These beautiful gowns are made of finest handkerchief linen than which there is nothing more exclusive and distinguished for undergarments just now. And if you have ever slept in a real linen nightie you know the luxurious feel of it. Such nightgowns for trousseaux have every stitch put in by hand; the hem is hand hemstitched and at the top beautifully done drawn-thread patterns define a small yoke or make charming trimming motifs on front and sleeves. The square neck opening and straight sleeve edge are finished with hem stitched hems through which ribbon is drawn; or have drawn thread beadings for ribbon. Sometimes a drawn-thread beading is run straight around the gown, below the armhole line, and is threaded with an inch wide ribbon, giving a graceful Empire yoke effect.

Ribbons for lingerie must now be of the handsomest quality, thick and soft and satiny, whatever the width. Double-faced satin ribbons are preferred, and if wash-ribbon is used it must be of beautiful quality. Lavender ribbons are preferred just now to pale pink or blue ones, and the ribbons on most exclusive garments are pure white.

Tapioca Cream.

Cover three tablespoonfuls of tapioca with water overnight. Put it into one quart of milk over the fire. When it boils add the yolks of four eggs well beaten, two-thirds of a cupful of sugar and a little salt. Stir until it begins to thicken; beat the whites of the four eggs to a stiff froth; stir the mixture into this. After taking from the fire, flavor with vanilla, pour into a dish and set away to cool.

Eyelet Embroidery.

It is seen again. It is much in vogue for collar and cuffs. It is cool looking and serviceable, and there is a crispness about it, most attractive. It makes an extremely smart gilet for the serge frock.

Persuasion.

"Did you know," said Mr. Dolan, "the poet says there are sermons in stones?" "No," replied Mr. Rafferty, "though I do call to mind that a brick-bat has here and there been a temporarily convincing argument."

FINANCIAL AND COMMERCIAL

By Telegraph to The Freeman.

New York, Nov. 3.—The stock market showed a steady tone at the opening today. United States Steel was ¼ higher at 80⅝ and Baldwin rose ½ to 90¼. Mexican Petroleum moved up over one point to 103¼ and General Asphalt showed a gain of ⅝ at 63⅝. Studebaker rose ½ to 75. Houston Oil advanced 1⅝ to 77⅞. The railroad stocks were in demand especially Northern Pacific, which rose one point to 75⅝.

Advances in all the various classes of bonds, some of the short term notes today moving up as much as 5 points in response to the reduction in the federal reserve discount rates, had an important influence in the trading of the stock market. Various groups of industrials were in increased demand, gains of 1 to 4 points being made. The greatest gain in these stocks was in Woolworth, which rose 4 points to 126. Sears Roebuck moved up over 3 points to above 70, but later reacted to 67⅝.

The market closed strong; government bonds unchanged, railway and other bonds strong.

World's Greatest Volcano.

The "House of Everlasting Fire" is part of the great volcano Kilauea, on the Hawaiian islands. What Niagara is among waterfalls Kilauea is among volcanoes. Not so beautiful as Vesuvius or Etna, not so high as some of the lofty dome mountains of South America, Kilauea retains its fame by sheer power in which it is unrivaled. The crater, about four miles square in extent, is an area of bleak desolation, a floor of lava cracked and seamed until it resembles one of the circles of horror in Dante's Inferno. —Kansas City Star

KINGSTON, N. Y., NOV. 3, 1921.

DON'T BE MISLED

All sorts of specious promises may be expected between now and election, but voters should not be misled by mere words What the Republican party has accomplished in the past is known The policies outlined in the local municipal campaign by Walter P Crane, the Republican candidate for mayor, are also known Under Republican administration Kingston has grown to be one of the most important cities in the Hudson river valley. That is a fact that is known to all. Mr. Crane if elected mayor will see to it that Kingston's progress remains unimpeded, and with a Republican common council he will be able to carry out the plans he has made public in his open letter to the voters of the city.

Political promises are easily made, and more easily broken, but the promises made by Mr. Crane will be fulfilled His record as a business man and as a mayor of Kingston prove that beyond a question. He has always been a keen student of civic affairs, and is qualified to cope with the problems that face the city at the present time. The position he takes on local issues he has made plain, and that position meets with universal approval.

There never was a time in Kingston's history when there were more important problems awaiting solution, and for that reason voters should carefully weigh the respective merits of the various candidates for the various offices to be filled on November 8 at the polls. The Republican ticket this fall is made up of men who are fitted to fill the positions to which they aspire. They deserve the support of the voters of the city, and there should be no question of their election.

Placing a cross mark in front of every eagle on the ballot on election day will insure to Kingston continued growth.

Ward B. Everett, the Republican candidate for alderman of the Twelfth ward, is one of the most widely known men in the city. He is a man who has always taken an active interest in the affairs of the city, and as a member of the common council he may be depended upon to look after the interests of the ward in which he resides and also of the city at large. He is one of the representative business men of the city, and is thoroughly familiar with the duties of the governing body of the city. The voters of the Twelfth ward will make no mistake in electing him their representative in the common council for the ensuing two years.

The Republicans of the Ninth ward have selected J. William Salzmann as a candidate for alderman of that ward, and it is expected that he will be elected a member of the common council by a large majority. As a resident of that ward for many years he is familiar with its needs, and will always give careful consideration to the welfare of the ward. Mr. Salzmann's election will insure to the residents of the Ninth ward a man who is competent to look after its best interests. The voters of that ward, irrespective of party, will make no mistake in selecting Mr. Salzmann as their representative in the governing body of the city.

Everett Room is the man who has been nominated by the Republican party to succeed Alderman Fred J. Room of the Second ward as a member of the common council of the city. Mr. Room is a man who has taken an interest in civic matters since becoming a resident of that ward and is well qualified to fulfill the duties of alderman. Indications point to the fact that he will be elected by a handsome majority, as the voters of that ward realize that he may be counted upon to look after the welfare and best interests of that ward at all times.

In Charles E. Smith the Republicans of the Tenth ward have selected as a candidate for alderman of that ward a man who is fitted to serve as a member of the common council, and who may be counted upon to perform his duties as an alderman in an efficient manner. Mr. Smith is worthy of the support of every voter in the Tenth ward, irrespective of party affiliation, and should be elected by a large majority.

Edward J. Ryan is the candidate for alderman of the Thirteenth ward on both the Republican and Democratic city tickets, and consequently his election is assured. He has been a resident of that ward for a number of years, and may be depended upon to always look after the interests of the residents of that ward.

What do you want to know about Nature Subjects? Send any questions of general interest to the Nature Notes Department of this paper. Look for answers in this column.

Can You Answer These Questions?

1. How many bear cubs are there to a litter? Is a litter born every year?

2. Do cactus plants have fruit?

3. Please tell me the name and habits of some small, black and white woodpeckers that have lately put in an appearance in our yard Am familiar with the red-headed woodpecker.

Answers In Tomorrow's Nature Notes.

Answers To Previous Questions:

1. What do you know of a small, long, black flea, that appears in the grass and on dandelions? How can I check this pest?

Without a specimen, impossible to do more than guess. Evidently one of the tiny flea-beetles, as Western-cabbage, Flea, Spinach beetle, etc. Bordeaux mixture sprayed on is recommended, or Paris green, or arsenate of lead. The Hop-flea beetle is another minute specimen, one-tenth inch long, shiny black, and with minute pits, in rows on its upper surface.

2. Please tell me if the toad makes any noise? I've heard a little chirp—usually before a storm—that does not seem to be from a bird.

Probably you hear a tree toad or tree frog, Hyla versicolor. It calls in damp weather, but is not a reliable "sign." The call is a sweet trill.

3. We have an abundance of shrikes, blue jays and sparrow hawks about here. Would that make any difference in the amount of song birds?

You do not say the song birds are few in your neighborhood, so how can we reply whether the presence of the three species you name has diminished the numbers of your songsters? If the latter seem lacking, it seems very possible they keep away from a neighborhood where so many predatory birds are plentiful. Birds are pretty sharp at learning where they can bring up their young in safety. Better clear out some of your bird hold-up men.

KIRCHNER RISING THROUGH MERIT

For four years George C. Kirchner has shown the people of this city that he thoroughly understands public affairs and his service to the public during all that time as a member of the common council led naturally to his nomination for supervisor by Republicans of the Seventh ward.

Mr. Kirchner is a life-long resident of Kingston and he has displayed his affectionate regard for the city in many ways. During his service in the common council he became thoroughly acquainted with the needs of the city and the individual wards and he has been foremost in promoting legislative action by that body and by the various city departments which would be of benefit to the people. Service of that character is a valuable asset which the voters of the Seventh ward owe it to the fellow citizens to see is preserved by giving Mr. Kirchner opportunity for further public usefulness in the board of supervisors.

For many years Mr. Kirchner has been closely identified with Rapid Hose Company, and has been active in all matters pertaining to the welfare and advancement of the volunteer firemen and the city fire department.

HARRY LIPKIN WILL MAKE GOOD

Harry J. Lipkin, the Republican candidate for alderman of the Sixth ward, is one of the most popular young men in that ward where he has resided for many years. He was one of the first to leave Kingston during the World War, going to Camp Dix, and was a year overseas with the 78th Division. He was wounded at St. Mihiel.

After being mustered out of service he returned to his duties in the shoe store of Gulliford Hasbrouck on the Strand, where he is now employed.

Mr. Lipkin, while a young man, has always taken an active interest in civic matters, and is well liked by all who know him. He is thoroughly familiar with the needs of the Sixth ward, and the voters will make no mistake in electing him their representative in the common council.

Joseph of Arimathea.

Joseph of Arimathea, according to most authorities, is represented as a wealthy and righteous Jew who begged from Pilate the body of Jesus and buried it in his own grounds. Joseph, though a member of the Sanhedrin, was secretly a disciple of Jesus and the ultimate act of courage by which he wiped out the reproach of his former timidity seems to have inspired Nicodemus to take a similar stand.

Science in Shipbuilding.

Among the actual branches of science which enter into shipbuilding the eldest is astronomy, which is still of great importance to navigators. Radio apparatus is peculiarly an advantage to the navy. Mathematics is an essential, of course, to all other sciences. Mathematical apparatus for range finding is employed which determines instantly problems containing as many as half a dozen variables.

SHULTIS ALWAYS HAS "MADE GOOD"

EDGAR T. SHULTIS.

Edgar T. Shultis, Republican nominee for supervisor in the Eleventh Ward, has proved himself worthy of the confidence of the voters who have placed him in office and in nominating him for the office of supervisor the Republicans of his ward have selected a man whose integrity and ability have met every test.

Mr. Shultis is not afraid of work, whether it be the daily toil by which he earns a living or the official duties with which he has been entrusted. Time and again both as supervisor and as sheriff of Ulster county he has shown himself a man of unerring judgment and action.

Born in the town of Woodstock, where he received his early education, Mr. Shultis worked on the farm for a number of years, and he worked hard as all his neighbors will testify. When he came to Kingston he took up an occupation requiring hard work and he never shirked. With ex-Mayor Walter P. Crane he took over the ice business formerly conducted by Crane & Goodsell and developed it into one of the largest retail ice businesses along the Hudson valley. The company later became known as the Binnewater Lake Ice Company, and Mr. Shultis still works hard at it.

The voters of his ward elected him supervisor in 1911 and re-elected him two years later. During his second term as supervisor he was elected sheriff and resigned the office of supervisor at the beginning of his third year in that office when he took up the duties of the sheriff's office. Both as supervisor and as sheriff Mr. Shultis "made good." He has "made good" in every other thing he has undertaken. During the World War he was actively engaged in every drive which helped the United States to win the war, and at all times he has been foremost in every movement for the betterment of the city and county.

The voters are familiar with Mr. Shultis and his record and are proud of the man and what he has done.

"X-Rays" and Finger Prints.

The modern detective makes use of X-rays. The subject's fingers are dipped into a metallic solution and then rubbed with a soft cloth. In this way the metal is removed from the ridges of the fingertips, leaving an X-ray photograph is taken, the latter often more clear than the finger prints. As the photographic plate can be very greatly enlarged, the most minute peculiarities are distinctly seen.

CONKLIN A MAN WORTH RETAINING

Charles E. Conklin has rendered consistently good service to his constituents and his renomination for supervisor by Republicans of the Fifth Ward is in keeping with the policy of the voters of that ward to retain able and efficient men in public office.

No man is better acquainted with the Fifth Ward than Mr. Conklin, who was born on Hasbrouck avenue in 1868. His boyhood was spent in what now are the Seventh and Eighth Wards and he attended school at School No. 2, known as the Commons School. Later his family returned to the Fifth Ward, where he has since resided.

In 1882 he entered the employ of the Cornell Steamboat Company as mess boy on the steamer Austin. He served in different positions on boats of the Cornell line until 1902, when he was stationed at Kingston Point as dock master despatcher of tows which important post he now holds.

In the performance of his duties as supervisor, Mr. Conklin, has displayed the same painstaking care which he has given to all work entrusted to him, public or private. His service in the board of supervisors during the past four years has been eminently satisfactory and the appreciation of his constituents can best be shown by his re-election by a large majority.

Socially Mr. Conklin is a member of Ulster Lodge, No. 76, Knights of Pythians; Aretas Lodge, No. 172, I. O. O. F., and Capitol City Harbor, No. 7, Masters, Mates and Pilots.

AUGUSTUS SHUFELDT.

The popularity, acknowledged ability and high standing among lawyers and laymen of Augustus Shufeldt, the Republican nominee for city judge, appeals strongly to the voting men and women of Kingston

His work on the city court bench has been marked by conspicuous legal ability, absolute fairness and impartiality and sound common sense

By training, experience and the natural aptitude Mr Shufeldt has shown the qualifications for the important office of city judge which the public desire in their judiciary The city court, both in civil and criminal cases is the court of first resort It is frequently called "the poor man's court," because its decisions in the majority of cases are final and no appeal is taken The importance therefore becomes at once apparent why the judge of this court should possess in a marked degree the commendable qualities whose application work out even-handed justice and create the public confidence which is the strength of the American judiciary system.

The Sharing Spirit

In an orderly home an announcement was placed in the bathroom to the effect that since everyone shared in its benefits, everyone was asked to take a hand in helping to keep it neat and tidy. That idea carried through a home would greatly relieve the housewife and at the same time inculcate the community spirit. A housewife in suggesting Odyssey to declare that the only way to make them about her realize what thought and care are needed to create a comfortable home would be to suggest it could be run sufficiently without

SHOULD ELECT LOUIS BROWN

Popular Manager of Champion Colonials is Republican Candidate for Supervisor in Sixth Ward, and Should be Elected by Big Majority.

Louis Brown, manager of the Colonials, the semi-professional baseball champions of the Hudson river valley, is the Republican candidate for supervisor in the Sixth ward, and should be elected to the county legislature by a large majority.

Mr Brown was born in this city on October 14, 1873. As soon as he reached the age of 21 he entered the political arena, and has always been an active worker in the Republican party. There are few men who are better known in the Sixth ward than he, and there is hardly a man woman or child who does not know him.

Many years ago Mr. B. became an active volunteer man, and still takes much interest in firemanic matters. He is also deeply interested in baseball, and it is due largely to his work as manager of the Colonials that Kingston was again placed on the baseball map of the Hudson valley this past summer.

Mr Brown is engaged in the confectionery business on Hasbrouck avenue. He has already served the Sixth ward in the county legislature and the experience gained at that time has fitted him to fulfill the duties of supervisor for the best interests of his ward.

For fourteen years Mr. Brown served with the old Weber Hose Company, and he is now an exempt fireman. There are many baseball fans who remember the famous old Red Monograms and at the height of their success he served the team as its efficient manager.

Mr. Brown has always taken an active interest in civic matters and his knowledge of public affairs has been acquired by careful study of events and men. The Sixth ward will make no mistake in electing him a member of the county legislature, and when the votes are counted election day it should find him safely elected by one of the largest majorities ever given a candidate in that ward.

Mr. Brown is a charter member of Loyal Order of Moose and a member of Kingston Lodge of Elks.

HIGH WOODS.

High Woods, Nov. 2.—Mrs. Wilson Ackerman visited relatives in Kingston last week.

Mr. and Mrs. Harry Wood, who spent their vacation at her grandmother's, Mrs. E. Short, returned to Long Island City. Mrs. Short went with them to spend the winter with her son, Jerry Short.

James E. Carle is confined to the house with an injured foot.

Mrs. Lansing Carle spent a few days in Kingston last week, attending while there the funeral of her aunt, Mrs. Julia A. Longendyke, who was a former resident of this place.

The Rev. and Mrs. George W. Gulick of Ulster Park visited at C. F. Snyder's last Thursday.

The Misses Sarah and May DuBois and Mildred York were guests at Louis York's on Sunday.

The Rev. Mr. Mattice filled our pulpit on Sunday. His subject was "Opportunity." An arrangement is being made by which we may have services each Sunday, which we hope may be carried through.

Peter and Anna Herrick of Pine Grove attended our church services Sunday afternoon.

Mrs. Charlotte Carle, who has spent the summer in rooms of Mrs. E. Short, went to Kingston last week to spend a few days with relatives before going to her home in Union Hill, N. J.

Mr. and Mrs. Sheldon Longendyke of Saugerties were guests at Nathan Carle's on Sunday.

Lewis E. Snyder had the misfortune to break the pelvis bone of his right rip last week. At the time he was loading boxes and barrels for Peter Bauer to take to Montgomery, Orange county. One barrel tipped over and threw him from the autotruck upon a barrel, breaking the bone and injuring him also internally. We extend him our sympathy and trust for his recovery. Dr. Gifford is attending him.

Mrs. Pusodrak has gone to New York city for a few weeks.

Mrs. J. Bittner had the misfortune to make a misstep while going out of Carle and York's store one night last week which has kept her at home a few days. We are glad to know she can get out again.

DRUG ADDICT JAILED.

Vincent's Father Testified Son Is Held Here.

Wade Vincent, aged about 23 years, was picked up at Marlborough on Saturday last for disorderly conduct, his actions being queer, and was brought to the Ulster county jail. Vincent is a drug addict and has been a medical student and is well educated. It is said he took eight grains of morphine, a dose sufficient to cause death to most people. Dr. John T Buckley, the jail physician is caring for Vincent and having learned that his home is in Brooklyn, a son of J. H. Vincent who resides on Spencer street that city, notified of his son's being in jail, and has received word in reply that young Vincent could be taken home.

LIEUT. DITTUS HAS MADE GOOD

Lieutenant Rudulph C. Dittus, who has served the city efficiently as alderman-at-large, is seeking re-election on the Republican ticket this fall, and should be elected by an even larger majority than that given him two years ago.

He was born in Kingston on December 12, 1885, and has been a resident of the city all his life. He first sought public office two years ago when he was elected alderman-at-large by a large majority, and the experience he has gained in the past two years will stand him in good stead when re-elected November 8.

Lieut. Dittus as a boy attended the employ of The Freeman Publishand from his boyhood has always taken an interest in all sports and activities. As a youth he was noted as a baseball pitcher.

It was during 1902 that he entered the employ of The Freeman Publishing Company, and at the time this country entered the world war was superintendent of the bookbinding and paper ruling department. When mustered out of service at the close of the war he returned to this city and purchased the stationery business of the late T. W. Wadsworth on lower Broadway. He added a bookbinding and paper ruling department to the business which he still continues.

He always took an active interest in military affairs and in December of 1903, he enlisted as a private with old Company M. When Company M left Kingston for Camp Wadsworth he was serving the company as first Meutenant. In November of 1917, he was transferred to the 108th Infantry, 27th Division, serving ten months in France and participating in all the engagements of his division.

It was in August of 1918, while in Flanders in front of Mt. Kimmel that he was wounded, but not seriously. In the last two days of hard fighting in October, 1918, he was in command of the First Battalion of the 108th Infantry. He was noted among his felow officers and the men under his commend for his coolness under fire.

Lieut. Dittus was the city organizer of the American Legion, and served Kingston Post as its first president.

He has made good in business, in military life, and as president of the common council, and deserves the support of every voter in the city, irrespective of party affiliation. Under his administration many important matters have come before the governing body of the city and his work as president of the common council has met with universal approval. Voters will make no mistake in returning him to office this fall.

AT THE THEATERS.

"City of Silent Men" at Keeney's—"One a Minute" at Opera House.

A sledge hammer blow is delivered against circumstantial evidence in "The City of Silent Men," starring Thomas Meighan, which begins a three days' engagement at Keeney's today. The production is founded on John Morosco's novel, "The Quarry." A newsy reel and comedy are added features.

Douglas MacLean's new comedy, "One a Minute," a satire on Barnum's saying, "There's a fool born every minute," has caught on in fine shape at the Opera House, where delighted crowds were in high glee last night. It will be repeated again tonight. Friday and Saturday Lionel Barrymore will be presented in "Jim, the Penman," an astonishing story of a Raffles and a Rufus Wallingford combined in one man.

Douglas Fairbanks in "Reggie Mixes In" is showing at the Auditorium tonight. What he starts and finishes with a tough gang of crooks brings laughs and thrills at the same time. Friday a western story, "Hearts of the Range."

The crowds that are seeing "Way Down East" at the Colonial Theater speak of it in the highest terms, and a number have gone twice, bringing friends. The opportunity to see it and hear the excellent music besides is afforded by the week's engagement at the Colonial.

Tribute to Italy's "Unknown."

By Telegraph to The Freeman.

Rome, Nov. 3.—Thousands of reverent men and women paid homage today to Italy's "unknown warrior" who will be interred with royal honors on Friday. The body arrived from the Isonzo battlefield yesterday and since then has been in state in the Church of Santa Maria Degli Angeli. Tomorrow it will be buried under Victor Emmanuel's monument—the "Altar of the Nation."

SCHICK BIG ASSET TO 13TH WARD

GEORGE SCHICK.

Every voter of the Thirteenth Ward knows and is proud of the record which George Schick has made and his renomination for the office of supervisor on the Republican ticket is a matter on which the ward is to be congratulated.

Mr. Schick has spent his life as a resident of the ward which he so ably represents. He is a son of Casper Schick and his birthplace was at Wilbur. At the age of fourteen he entered the employ of Spardie Brothers, his work being to paper barrels at the old James cement works in the town of Esopus. The following year he worked for George Turner, fixing barrels in the Sherman & Weeks plant. At the age of sixteen he entered the grocery store of D. H. Zoller and has remained with Mr. Zoller ever since. Mr. Schick knows and is known by every man, woman and child of his ward.

Mr. Schick has served ten years as supervisor and during all all that time has rendered faithful and efficient service to the taxpayers of his ward, of the city and county. At all times he has been alive to their interests and has left no stone unturned which would be for their benefit. His familiarity with the duties of his office make him especially valuable to the ward and to the city and his constituents know they can find him at all times striving to accomplish results which will be for their benefit.

Socially Mr. Schick for many years has been active in the affairs of Twaalfskill Hose Company and always has been ready to respond to any demand for his services which would be of benefit to any of the residents of the ward or the enterprises in which they are interested. For a number of years he has been actively identified with the affairs of the Hudson Valley Volunteer Firemen's Association of which he is a member, and in the Loyal Order of Moose.

ON-A-JOB, OFF-A-JOB JIM!

Being a Story Of how Jim got on a job and why he got off it again.

Jim leaned over the wash-rail of the lower deck, manipulating idly a long rope which he swished back and forth, fascinated by the phosphorescent glow that he stirred in the depths of the dark water. The fringes of the waves were bright, as with an invisible sun below, and as the rope cut back and forth through the water, it seemed as though a sheet of flame was following Jim's movements.

Tired out, after a long day of unaccustomed tasks as deck hand, Jim was half asleep as he leaned against the rail, drowsily thinking of his narrow escape when he flung the hawser over the nigger-head, and nearly flung himself into the water at the same time. He was picturing quite vividly his descent into the water when an object went hurling through the air, from above him, and a second later had hit the water with a thud and a splash.

Great circles of illumination spread around the object. Jim was sure he could make out a human body. Already the boat was leaving it astern, but the moving turmoil of light still betrayed the spot where the object had fallen.

"Man overboard!" shrieked Jim, trying to decide, in that half moment of indecision, whether he had better dive in after the object with the boat going onward at a rate that would leave him far behind in a twinkling, or if he would spread the alarm and wait for the captain's next move.

But already the alarm had been sounded by his cry. He felt a quick churning of waters beneath as the boat slowed down. Footsteps pattered hastily overhead.—a life boat was lowered.

Jim begged to accompany the rescue crew, reporting hastily what he had seen, at the same time seizing one of the oars and striking off with all his might in the direction they had just come.

Thanks to the phosphorescence they were able to pick out the course the ship had taken back, until far in the distance, they discerned a moving mass of light.

"Looks like someone swimming," exclaimed Jim. "By Jove, it is."

Soon they had reached the swimmer's side, and were pulling into the boat a young girl, clad in her pajamas. She sank exhausted into the bottom of the boat, and for three speechless while the men turned about and headed for the "John Hartman."

After she had been attended to by her companion and the ship's doctor, Jim and Capt Cummings were called into her stateroom to hear her explanation. "I suppose you think I tried to commit suicide," she shivered.

"I didn't know what to think," returned Jim. "Murder was far-fetched to my mind when your body struck the water."

"Isn't it terrible," moaned the girl. "It is all due to the fact that I walk in my sleep. I must have had one of my attacks, and my companion who always accompanies me on my trips, had fallen asleep. I must have got out on deck, climbed the rail—I don't know what really happened. But when I struck the water I woke up and realized what a terrible plight I was in. They tell me that you gave the alarm," she added, turning to Jim. "I have much to thank you for."

"Well," blushed Jim, "you might give a little credit to your own powers, your ability to swim, and to the phosphorescence."

AUTOMEN ALREADY TALKING SHOW

Twenty-one members of the Kingston Automobile Dealers' Association met Wednesday evening at Cuneo's Lake Katrine Inn for the purpose, first of enjoying a fried chicken dinner and a second of discussing the automobile business. The first part of the program was duly carried out much to the satisfaction of the members.

Following the dinner various matters of interest to the automobile dealers were discussed, among them the matter of holding another automobile show. The Kingston show last year was one of the best held in any town outside the largest cities and the dealers are planning to hold a better one this year so plans necessarily must be started at an early date.

A discussion of the automobile business in general was held and plans for future work by the Association were discussed.

In the absence of President Henry Stryker, Vice-President Abram Molyneaux presided at the meeting. Another meeting will be held within a few days when important business will come before the members and at that time an effort will be made to have 100% attendance.

Monastery Wine Mystery.

Mystery surrounds an old monastery near South Lea farm, Datchet. The greater part was pulled down some years ago and fire destroyed a good deal of the remainder. There are several deep wells, and it is said that at the bottom of one there are 3,000 bottles of wine placed there by monks, but an attempt to find them has failed. Under the ruins are a large number of earthenware bottles of quaint pattern, and there is a legend that a subway leads from the monastery to Burnham abbey.—London Daily Mail.

BIRDS HAVE RIVAL

Ornithologist Says Planes Outspeed Fowls.

Col. Meinertzhagen Asserts Feathered Fliers Can Reach Speed of 100 Miles an Hour.

Every one surely who has watched the flight of the swifter birds has made his own estimate as to their speed. The speeds attained by the carrier pigeon, the duck and the faster of the sea birds have formed the subject of endless guesswork and inevitable exaggeration. Birds which are incapable, even when at full stretch, of doing more than 40 to 50 miles an hour have been credited with 100 and more.

Now the fact of the matter is that nothing is more difficult than to judge of the speed of any object through the air by mere human observation. Foreshortening due to perspective alone renders it impossible to tell just when a moving object passes above some fixed point on the ground, and almost invariably the estimated speed is far beyond the actual. At the present time the highest well-authenticated speed is that of homing pigeons, some of which have reached a speed of 60 miles an hour over comparatively short distances.

But now comes Colonel Meinertzhagen, a noted ornithologist in Great Britain, with the statement that during his anti-aircraft duties in the war, he trained his men in instrumental work by making them take observations of the flights of birds. These he collected and then confirmed their results by instrumental work himself. He tells us that the speed of birds, as thus accurately ascertained, is far below what is popularly believed to be, varying from 20 to 40 miles for the smaller passeres to from 40 to 50 miles an hour in the case of waders. Those speeds represent steady flight, but when a bird is frightened by an enemy, or when it is pouncing upon its prey, it can be accelerated greatly for a limited time. He estimates that for a short distance the swift can reach a speed of 100 miles an hour.

The airplane, therefore, has greatly surpassed the swiftness of the birds both in its power of sustained speed and in its maximum speed. From 100 to 120 miles an hour can be maintained by many of the standard machines, and we know that last year the racing speed was carried up to from 180 to 190 miles per hour, while recent models are credited to be even faster.

Where the birds still greatly surpass the human flying machines is in the matter of taking off and alighting. The seabirds, and all birds in fact, by changing the angle of incidence of their wings are able to reduce their landing speed at a rate which the airplane and the seaplane cannot at present approach.—Scientific American.

Claims of Philetaerus.

The custom of stealing a poor man's patent and claiming it as one's own is pretty ancient, observes the Detroit News. Governor Philetaerus of Pergamum, a city in Mysia, Asia Minor, is cited as one of the first examples among the exalted pilferers, for archeologists give him the credit of having invented the art of making parchment in 280 B. C., though they admit that it was probably a humble artisan who first conceived the idea of preparing the skins of animals in such a way that they could be used for writing purposes.

Philetaerus, by the way, didn't enjoy his laurels over-long. He lost his province to King Attalus in 197. And this ruler, taking advantage of the existence of parchment, established a library which, in those days, was considered quite a marvel. It contained all of 300 manuscripts.

Cancels 120 Letters a Minute.

A mail canceling machine has been invented which cancels 120 letters a minute. The device is being experimented with by the United States Postal department.

The machine works like a typewriter. Mail placed in a long feeder trough passes under the canceling device and the keyboard, operated the same as a typewriter, sorts the mail into 56 different chutes. A special machine built on the same principle may be used on mail cars if the government's experiments prove satisfactory.—Milwaukee Sentinel.

Put Rail Workers on Trucks.

L'Industria, an important technical journal, printed in Milan, estimates that if the 200,000 railway workers in Italy were each employed in driving ten-ton trucks for eight hours a day, for 300 working days a year, they would transport nearly five times as much freight a mile per annum as the Italian railways now carry.—The Living Age.

Woman Streis With Pig.

Not long since an American woman of wealth made the Londoners sit up and take notice by promenading in Hyde Park escorted by a pet pig. The little porker was, of course, a perfect aristocrat of the sty, wore a becoming blue ribbon, and a dainty little coat, but his grunt was the same as that of the most plebian pig, and his tail just as curly.

An Obliging Partner.

Mrs. Krum—Can you count on your husband's support?

Mrs. Krum—Yes. He is willing to do most anything to make our divorce a success.

Subjects Dogs.

Professor Pickering declares that the thickness of Saturn's outer ring of the outer ring A can only a few miles, that of the inner ring B is some forty miles greater, while the thickness of the crape ring is about 1,000 miles.

Enamel Used as Cement.

Bath enamel has been used successfully in mending crockery or china. The pieces are joined carefully after the enamel is applied and any excess enamel that exudes is not rubbed or wiped off for fear of disturbing the joint. The mended article is then left two or three weeks to harden, when the excess enamel is rubbed off with sandpaper. The article is then ready for use and will hold hot as well as cold liquids and solids.

Satisfaction.

The man who does his best may not always win but he has the satisfaction of knowing that he wasn't defeated because of his own carelessness.

The Kingston Co-operative Savings and Loan Association meets Friday night, 7:30 to 9 p. m. Shares are now being issued in the 60th Series. Subscriptions received now. 288 Wall street.—Advertisement.

LITTLE TOUCHES ADD TO CLOTHES

Embellishment That Brings Frock Into New Realm Is as Important as the Garment.

WEARER SHOULD BE CHOOSER

No Reason Why Woman Cannot Have Any Kind of Trimming She Likes—Individuality Need Not Be Sacrificed.

Ways of embellishing clothes and of adding to simple frocks touches that bring them into an entirely new realm are as important as the clothes themselves, oftentimes more so, asserts a prominent fashion authority.

A great many women like little or no trimming on their clothes; others enjoy bits of color, ribbons and laces.

This Delightful Dotted Crepe Dress Is Charming With Its Flowing Sleeves and the Fichu of White.

This is more or less a matter of taste, and it would be making rather a strong statement to say that one is good taste and the other bad.

Things of this sort depend greatly on individual temperament. There is no reason why a woman should not have any kind of trimming she likes, especially in these days when so many kinds are offered and all are as rich in suggestion.

Because one woman likes her clothes plain and of severe simplicity is no reason why another should sacrifice her individuality by copying her.

Fussiness Threatens to Become Vogue.

There is a great deal of unnecessary criticism of women's taste in clothes. Never were they more comfortable, hygienic, prettier or more sensible than now. But there is a cloud looming on the horizon, heavy with the suggestion of the fussiness of Victorian days, when dress probably was at its worst. This cloud, however, may be one of commercialism—that is, dressmakers and manufacturers endeavoring to increase business by establishing altogether new styles.

They have, however, one very potent fact to contend with which is that women themselves make the fashions, and during the last few years more than ever before, have shown their ability to do so, as well as their independence in dress. They have been most discriminating in the selections of the styles they would accept.

Sleeves are worthy of an article all to themselves. Although a great deal has been written about sleeves the surface of the subject has only been scratched. Artists in the dressmaking world apparently are putting forth every effort to work out new ideas in arm covering. During the long time that arms were left wholly or partially uncovered each dressmaker apparently had hidden away in the recesses of his or her mind an infinite number of ideas on this subject which grew to immense proportions through suppression.

Novelty in Fringe Sleeve.

Now we have sleeves of the Mandarin type, sleeves that are slightly flowing and have in turn wide, flowing cuffs, straight loose sleeves of bright color set into somber hued frocks, others that fit to a deep armhole and fall away from the arm, leaving it bare, and that are caught in again at the wrist. But more striking than any of these are the long sleeves of fringe which Paris has brought out. These take their place in the novelty class, but are interesting as one of the many strange things being done to this part of dress.

The Parisienne is tying her sash in a new way; that is, wrapping it around her body, giving it a twist at either side by slipping the ends through the belt and bringing them back to be fastened in a loose knot in the front.

Nothing very novel about this, you will think, but it is really a pleasing change from the monotony of the way women have been tying string belts or wide sashes.

It must be said that in a simple matter such as this very little originality has been shown. It would seem that hundreds of different ways of knotting a sash might have been thought of. In countries where the sash always has played an important part in native dress the way in which it is tied is significant of many things.

Loath to Adopt High Collar

Writing of high collars is about as discouraging as designing them. During the last two years much time has been spent on both. Still, nobody has taken to high collars with any amount of enthusiasm, in fact, they rarely are seen.

But collars of the type referred to and which are somewhat of a compromise between the high and low collar, have been in evidence of late. Sometimes the turnover part is much more exaggerated, like a wide Eton collar. These are quite becoming and are likely to enjoy considerable popularity among the younger women.

Contemplation of collars in general gives one a feeling of surprise that there has not been more change. Women must consider the monotonous neckline so long in evidence very becoming, otherwise they would have accepted some of the many things offered them. It would seem that the time is about ripe for some changes in this direction.

Creating Fringe Effects.

Fringes of self material are featured prominently on many of the autumn clothes. Both cloth and crepe frocks have a novel fringe trimming achieved by running rows of hemstitching along cascading panels, the sleeves, or even the bottom of the skirts, and slashing the hemstitching to form fringe, which, of course, leaves a picot edge on each strand of the material. Such a treatment is used on the French dress.

It seems impossible to get away from fringe in one form or another. All of the great dressmakers still are using it. A model from Doeuillet has fringe applied to a back tunic and a tuft of it on the short ends of a belt knotted in the front.

On this model we see another form of trimming which sprang into prominence this summer; that is the embroidery pattern made by perforations. As in most perforated cloths, a bright, contrasting lining is used. Here the dress is of black and the lining revealed through the large eyelets is bright red.

Long Capes That Match Dresses.

Long capes that hang as part of a dress or that match the dress, but are detachable, are among the new fashions. A model in which a cape is made to appear as part of the frock while really detachable is of black cloth, the cape having a lining of rust-colored taffeta. As it falls from the shoulders, a cascading effect is given at either side, thus revealing the contrasting lining.

Designing clothes is approaching more and more the imminence of a fine art. The sources from which designers gather the ideas that go into dress are as interesting as they are varied.

America is showing a growing interest in costume design, and it is a question as to whether, in time, this growing interest will not tend to make us rival Paris in fashion supremacy. Little by little we are relying on the ability of our own designers to create distinctive modes with less dependence on what they are wearing in Paris, and the time may not be far distant when the world will look with respect and concern to see what America is wearing.

The director of one of our great American fashion academies, when interviewed recently, had much to say in praise of the ability of the young American designer.

Canton Crepe, Cascading Panels of Silk Hemstitched at Narrow Intervals and Slashed to Form Fringe.

A successful costume designer must be responsive to the motifs and ideas to be found in the dress and arts of ancient times. The classic Greek dress is perhaps richer in suggestion than the costume of other ancients. This is because of the beauty that the Greeks obtained through simplicity.

Armageddon

Armageddon exists geographically. Specifically, its location is the great plain of Esdraelon. There it was, long centuries before the [illegible] of Christ, that the Egyptians sought to gain control of Palestine by arms, fighting the battle of Megiddo and taking that city by storm, but failing to subdue the bravely stubborn local princes for many years thereafter. It was there that Gideon triumphed over the Midianites, and Saul over the Philistines; there also that Elijah confounded the prophets of Baal. And there as well, that General Allenby defeated the Turks in the Holy Land campaign of the recent war.

R. G. GROVES IS CAPABLE MAN

Eighth Ward Republicans Select Leading Young Attorney as Candidate for Supervisor of What Ward —Resident of Ward All His Life.

Robert G. Groves of Montrepose avenue one of the leading young lawyers of the city, and a resident of the Eighth ward all his life, has been selected by the Republicans of that ward as a candidate for the office of supervisor, and he will be elected by a handsome majority.

Attorney Groves has not only been a resident of the Eighth ward his entire life, but his people before him have been residents of that section of the city, and there is no man in that ward who is better acquainted or more thoroughly familiar with its needs than Mr. Groves.

During the World War he enlisted on May 25, 1917, and served afloat in the United States Navy, and upon his discharge at the close of the war he returned to Kingston, and resumed the practice of law. His offices are on the Strand.

Attorney Groves has been connected with Kingston Post, No. 150, American Legion since its formation as insurance officer. He is now county war risk officer of the American Legion for Ulster county. His duties are the looking after and being of service to ex-service men and seeing that they get their insurance and compensation, and that disabled men are properly taken care of. This work is done by Mr. Groves entirely without compensation.

This is the first time that Mr. Groves has been a candidate for any political office, but the Republican party realizing that the Eighth ward should be represented by a capable man in the board of supervisors selected Mr. Groves as the candidate. He is a young man of keen legal training and a close student of civic affairs, and may be depended upon always to look after the best interests of not only his own ward but the city at large.

MILLER DESERVES RETURN TO BOARD

WALTER C. MILLER.

The growth and development of the Second ward have been a matter of pride to every resident and the importance of the ward has been reflected in the selection of officials. The election of Walter C. Miller as supervisor two years ago and his renomination by the Republicans of the ward, therefore, followed as a matter of course, and every resident of the ward may take great pride in Mr. Miller's record.

Mr. Miller is a Kingstonian by birth and has been a resident of the Second ward for the past twenty-six years, during which time the principal development has taken place. He is therefore thoroughly familiar with the ward, what it has done, what is can do, and by training, experience and ability is well qualified to speak for the voters in the county legislature.

Evidence of his business ability is furnished by the important positions which Mr. Miller has occupied with big industrial concerns. For eleven years he was connected with the Ulster & Delaware Railroad Company, for a number of years he was commercial manager for the Kingston Gas & Electric Company, and later helped to establish firmly the business of the Universal Road Machinery Company. The industrial development of the city has received careful attention from Mr. Miller. He is a member of the real estate firm of Coutant & Davis and has become thoroughly familiar also with real estate throughout the city and county, which knowledge is of inestimable value in the deliberations of the county legislature.

Mr. Miller's record during the two years he has been serving the people of his ward has everything to commend him for re-election. His influence and his vote always have been in the interests of the taxpayers and in every way he has shown himself worthy of the confidence reposed in him.

DAN R. HANNA DEAD AT CROTON

By Telegraph to The Freeman.

Croton-on-Hudson, N. Y., Nov. 3.—Dan R. Hanna of Cleveland, son of the late Marcus A. Hanna, died at 3 a. m. today of heart trouble on his estate here.

Dan Hanna was publisher and proprietor of the Cleveland Leader and News and was interested in many of Cleveland's enterprises. He had been married four times, and was widely known as a sportsman, having a well known stable.

THE REV. MR. PIPER REMOVES.

Clintondale Friends' Church Pastor To Leave Village.

After twelve years of faithful and fruitful service in the Clintondale Friends' Church and in the community at large the Rev. and Mrs. J. D. Piper have resigned their pastorate to move to a new home near Marlborough for a long-needed change and rest in "God's out-of-doors" where weariness and care slip away and where peace and spiritual shepherd, preaching and exture's God recuperate the body and spirit.

Mr. Piper was indeed a true spiritual shepherd, preaching and exhorting to faithfulness and righteousness; and like every true shepherd, knew every member of his flock.

Mrs. Piper, gifted and refined, was in fullest sympathy with her husband's ideals and methods of work in the church and community. She loved the boys and girls, often having them in her home, where her wise counsel and gentle, winsome manner won their hearts for God and the church.

Young, as well as old, saw in our pastor and his wife, respect and love for both poor and great. Always cheerful and kind, always endeavoring to do good, their kindly endeavors should be felt and acknowledged by all. Showing in the whole course of daily life the reality of Christianity, they belonged to the community, visiting from house to house, giving comfort and cheer to the sick and needy; and in the hour of bereavement, bringing the mourning ones to the "Throne of Grace" for comfort and consolation. Day and night, fair weather and stormy, saw them ready and eager to serve those who needed help.

We shall miss them from among us, but should remember the simplicity and truth of their teachings. It is no time for faltering among friends, but we must bring forth the "peaceable fruits of righteousness" that we may be able to say in the language of the text which Mr. Piper used in his last Sunday's sermon, "I am not ashamed, for I know in whom I have believed, and am persuaded that He is able to keep that which I have committed unto Him against that day."

On behalf of Clintondale meeting of Friends. Mary J. Weaver, clerk of Pastoral Committee.

IN THE ACCESSORIES LIST

Purses, Bags and Costume Jewelry Provide the Keynote in Displays of Fall Novelties.

Originality is the keynote of the displays of purses, bags and costume jewelry this season. One is supposed to have as many pocketbooks as one has costumes to wear with them, and they should, of course, be in harmony with one's hat and other details. For dress purposes, the times when one goes calling, if indeed anyone ever indulges in this form of civility any more, there are smart-looking envelope purses which should never be parted out of their slender lines; envelopes of moire with flexible metal edge having an initial, and sometimes with an edge of marcasaite, a steel so brilliantly cut that it has the effect of rhinestones. The envelopes take as many forms as do the paper oblongs and squares from which they are named. An oblong pocketbook with a strap near one end has a very dignified air whether it be in moire, which seems to lead in envelope effects, or in satin, which is also carried.

For a bag mounted on a Japanese frame, navy moire is embroidered in a cherry blossom design and one may know that the fittings are in keeping with the attractive exterior.

Having made frames out of everything under the sun tiny jet beads, of course, are not omitted. They cover not only the frame but the strap on which the bag hangs from the wrist, a long narrow affair made of double and overlapping rows of monkey fur. Fur bags have been tried at various times and not always with success; but the early season brings a few new models in its wake, and monkey seems rather likely to succeed where less adaptable furs have failed.

BROWN AND ECRU ARE SMART

Warmer Shades are Given Preference Over Gray Toned Blouses for Fall Wear.

Though there are many gray-toned blouses among the autumn models, one notes a tendency to get away from the rather overdone dove shade and a strong tendency toward the brown tones. In tailored suits brown is an extremely fashionable color for autumn; some of the most distinguished French tailleurs are in coffee brown, or fawn, or beaver brown, and, of course blouses in the brown, tan and ecru tones will go with these brown tailored suits. There is one color that simply will not go with brown—and that color is gray. Almost all other shades may be combined smartly or harmoniously—but never brown and gray.

Black is another modish color for tailored suits and with these black suits gray, rather than tan blouses, will make the proper harmony. So there are plenty of gray-toned blouses, though brown, tan and ecru ones are far more numerous. One ecru georgette blouse is trimmed with deep cream Venice lace and is mounted over a sleeveless slip of flesh-tinted chiffon. The vestee and square neck are in line with the new mode and the deep collar coming far down at either side of the lace vestee is graceful. The sleeves are just over the elbow and are trimmed, like the collar, with dangling crochet ornaments. This blouse comes just over the waistline and has a narrow folded sash which loops over once at the back, with short ends weighted with the crochet ornaments.

USE VELVET FOR FALL HATS

One of the smartest of fall styles is this sapphire velvet. The turnup brim is ornamented by two antique silver and cut steel bead ornaments.

Brown Shades Rule.

One has only to make a round of the specialty shops to become convinced of the place the brown shades have in fall fashions. One charming youthful frock is of brown red russian crepe with a wide band of open-work trimming, while the rule as tan shades are represented nearly everywhere. Even the evening gowns have adopted the bronze brown shades, especially in patterned robes, as these right up better than most shades of brown for evening wear.

Snakes.

The snake continues to be prominent and it is no difficult task to make this of the dress material or ribbon, and then trust up some silk for the fringe edging, but for the woman who does not care to do this herself there are ready-made collars in large variety to be had in the ribbon section. They can be had in plain or fancy ribbons, among which the Roman stripes are prominent. The home dressmaker can save $2 or more by buying two yards of ribbon and making fringe herself.

High Praise.

Pat was exceedingly fond of the washtub who lived next door. She often asked him to stay for meals. One day after a dinner which he enjoyed very much, he turned to the mistress of the house and said: "You are a mighty good bitter bore."

IF YOUR FRIENDS ARE EATING YEAST

THEY WILL BE GLAD TO KNOW THAT THEY CAN GET TINY TABLETS AT DRUG STORE

EASY TO TAKE—RESULTS QUICK—BETTER FOR YOU

So many people are eating yeast, spinach, oranges, etc., and drinking quarts of milk each day in search of Vitamines that the chemists have perfected a tiny tablet containing a proper dose of both Water and Fat Soluble Vitamines in highly concentrated form. The tablets are more economical, less bother, easier to take and agree with the stomach better.

The reason people want Vitamines is because Vitamines bring more strength weight, color, freedom from boils, carbuncles, pimples etc. Doctors say most of us need more Vitamines than we get in a regular meal, and it is simply amazing what these Pinos Pho Vitamine tablets will do for a person in three or four weeks' time. The tablets are made in America's greatest laboratory. Tons of yeast are used. They get Vitamines also from hulls of rice, and mix the concentrated elements together into a proper dose—add Glycerophosphates, etc., and you get in a tiny tablet a scientifically compounded tablet that does amazing and most unusual things for men and women who are weak, thin pale, undernourished.

Local druggists recommend this new powerful way to take Vitamines, and you can get a bottle of sixty Pinos Pho Vitamine tablets at the nearest drug store or send $1, plus 4c war tax to Irving Laboratory, Wheeling, W. Va.—Advertisement.

WHAT CRANE SAYS HE WILL DO

"I shall insist upon the policy of pay as you go, and shall oppose the incurring of debt to be paid by a succeeding administration."

WHAT CRANE DID DO---

During the last year of Crane's administration as Mayor, he incurred a debt of over $100,000.00—and issued bonds and notes against the city which succeeding Administrations had to pay.

For proof of the above see City Treasurer Doremus's report dated December 1, 1909. Also Mayor Irwin's message dated January 1, 1910.

Some difference between pay as you go and $100,000.00.

WHAT?

What Mayor Canfield says Crane did to him—

"Mr. Crane gave his word of honor that he would not be a candidate."

MR. CRANE IS A CANDIDATE.

Tales Told by Hands.

A plump hand is a good sign in one's girl friend. It is a sign of good nature. Limp, floppy hands denote indolence, but a firm grasp is only given by one who is industrious.

MRS. WINNE—

Was heard in a street car to say to Mrs. Brown: "I was at the Opera House yesterday and 'One a Minute' is the cutest comedy I've ever seen."

Why Should You Follow A Crooked Path?

Often a cowpath has been allowed to become a village street, and as the village expanded, tradition has made the winding way an expression of a cow's will.

Habit is always forging chains to enslave us, so that what has been found bearable by the fathers is accepted by the sons.

Who cannot recall the coffee-pot Mother put on the stove early in the morning, warning us not to let it boil over?

As children, we were not permitted to drink tea or coffee, because it would stunt our growth or make us nervous and irritable. When older, however, we craved a hot drink with meals, and custom gave us our tea or coffee.

Finally, upon the instructions of the doctor, Mother gave up her tea and coffee. But that meant nothing in our young lives. Our vitality was then strong enough to throw off any ill effects.

But our time came, and we learned by experience that we could not drink tea or coffee. When we had it for breakfast it put our nerves on edge. When we drank it at the evening meal, we tossed about in wakefulness most of the night.

And then we found Postum, a pure cereal beverage, free from the harmful drug, caffeine, in tea and coffee. We liked the rich, satisfying flavor of Postum—and also the better health which resulted. And, too, we were surprised to find how many of our neighbors had made the same discovery—had learned the value of "health first."

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes. Sold by all grocers.

Every Edison Cabinet is a Period Cabinet

TO-DAY, when you replace a piece of furniture or acquire an additional piece, your new acquisition is preferably a period piece. All of us now realize that furniture design is an art which was at its height in the Eighteenth Century, and that we must go back to the old masters of this and earlier dates if we want the best in furniture.

There is no reason why period furniture should be prohibitive in price. Every model of the New Edison, "The Phonograph with a Soul"—even the least expensive model—is encased in a beautiful period cabinet. There are seventeen different models—each a masterpiece.

Convenient terms of payment can be arranged.

Come to our store and ask to see an exact duplicate of the one hundred dollar phonograph, which you can buy for $[illegible]. There are less expensive models, but if you want a duplicate of the three hundred dollar phonograph, we shall be glad to make the terms exceedingly convenient.

NATIONAL COAL STRIKE IMMINENT

Sporadic Walkouts And Threats Of Concerted Action By Union Chiefs Resentful Over Judge Anderson's Edict.

By Telegraph to The Freeman.

Indianapolis, Ind., Nov. 3.—Emerging from beneath the cloud of a threatened nation wide railroad strike into the sunshine of industrial peace for the brief span of a few short days, the nation today was plunged into the shadow of a menace scarcely less serious—the probability of a widespread tie up of coal production.

In this case, however, it is declared, there are no differences between the miners and operators. It is a strike against the decree of Federal Judge Anderson suspending the check off system and prohibiting further efforts to unionize the West Virginia coal field.

Just how broad in scope the impending mine tie-up may grow could not be accurately foretold today.

Taylorville, Ill., Nov. 3.—Thirteen hundred coal miners employed in the Peabody mines here went out on strike today in protest against the Anderson injunction decree. Two mines were closed as a result.

Nelsonville, Ohio, Nov. 3.—That 2,000 coal miners are on strike today in the Hocking Valley district and that the walkout, constituting a protest against Federal Judge Anderson's injunction decree prohibiting the check off system, is spreading, are the claims made here by union miners.

Charleston, W. Va., Nov. 3.—Union miners in West Virginia will await action by the operators before quitting work in protest against Judge Anderson's injunction order abolishing the check off system of collecting miners' dues and assessments, Acting President M. L. Haptonstall said today.

Columbus, Ohio, Nov. 3.—Threat of a state wide strike of miners in Ohio was made here this afternoon by officials of the Ohio United Mine Workers.

Pittsburgh, Penn., Nov. 3.—There will be no walkout of miners in western Pennsylvania until November 12 or 14, it was announced just before noon here today following a secret meeting of President Robert R. Gibbons and other officials of District No. 5, United Mine Workers of America.

Staples a Good Choice.

In renominating Calvin E. Staples for town superintendent of highways, Republicans of the town of Marlborough selected the man who has done a great deal to put the highways of that town in their present excellent state. The highways of Marlborough during the ten years Mr. Staples has occupied the office of town superintendent have become among the best in the county and the growth of traffic among the fruit growers would have been impossible unless the improvement of the roads not only had kept pace with the increasing business but had kept slightly ahead of it. Mr. Staples is one of the most proficient road builders in the Hudson valley.

Back From Diamond Mines.

John G. Baragwanath, a consulting mining engineer, son of the pastor of the St. James Methodist Church in this city, has just returned from a four-months trip to Brazil. At Diamentenia, where is located Brazil's famous diamond mines, he with three assistant engineers had charge of the diamond works for thirty days in order to ascertain their worth. These mines have now been purchased by an American syndicate. Until the discovery of the precious stones in South Africa, South America, specially Brazil, produced most of the diamonds for the markets of the world.

WINS $100 PRIZE BY HER LETTER

Miss Anna Stevens Reed, of Highland, Ulster County, won a $100 prize for the best letter in answer to the question, "What's to be done when one sister falls in love with a man who comes a-wooing the other sister?" The prize was offered by the McCall Magazine and the letter of Miss Reed appears in the November issue of that magazine.

The decision was made known by Winona Wilcox, of the staff of McCalls, that Miss Reed's letter was the best among the hundreds received.

Miss Reed is an old resident of Highland and lives with her sister, Miss Emily Reed, on the New Paltz turnpike. She has done of late years considerable writing of varied character, but has always been decidedly secretive regarding her literary work. She is a member of the Presbyterian Church in Highland and is active in all of the church societies and interests. She is a sister-in-law of Mrs. C. W. Richie, formerly of Highland.

The letter written by Miss Reed which won the $100 prize, follows:

"What's to be done when one sister falls in love with a man who comes a-wooing the other sister?"

It seems to me that the solution of this problem lies with the superfluous member of the trio. If I were so misguided as to fall in love with a man who wanted my sister and not me, on being made entirely sure of that fact, I would stifle the pangs of mortification and renounce all selfish sentiment and be thankful that my brother-in-law would be a man whom I found agreeable.

If not strong enough for this course, I would put a hundred miles between me and those two and proceed to forget them.

Should it not prove possible to leave home, I would adopt a new pursuit. Church work has its attractions; chickens are very absorbing; learning a new language leaves no time to mope, while music will take as many hours as one can give to it and then clamor for more. It is also true that writing for print, and getting it printed, unless there is unusual talent, will provide all the excitement of a lottery without its usefulness.

I want no stolen goods, so it would not occur to me to enter the lists as a rival.

In one way or another I would conquer an affection which would endanger the peace of the sister I love, who has a right to expect such treatment and who would, I am sure, do as much for me if the tables were turned.

Queen Mary.

(By International News Service.)

Do you remember 'way back when Queen Mary of England looked like this? The above photograph was made when she was the Princess Mary of Teck, in 1889. She was born in 1867 and was married in 1893 to the then Prince of Wales, now King George of England.

Hawaiian Stamps.

The first woman's portrait to be placed on a Hawaiian stamp was that of the Princess Victoria Kamamalu, who appeared on the 1-cent issue of 1869. She was a daughter of Kamehameha V., one of the most energetic of the native rulers. In the 1882 issue a picture of the Princess Likelike appears on the 1-cent value. Queen Liliuokalani graced the 2-cent stamp of the 1891 issue, the portrait being excellently engraved.

The ambition to be Alaska's first kindergarten teacher has brought Miss Dorothy Troy ten thousand miles from her home in Alaska to fit herself for her chosen work. She has entered the Kindergarten Training School at New York University. Miss Troy is the daughter of John W. Troy, editor of a Juneau, Alaska, newspaper. She was born in the states, but has spent most of her life in the far north. "There isn't a kindergarten in all Alaska," said Miss Troy, "and it is my plan to start the first one there. After I have finished the course I expect to get a year's practical training and then go back to Juneau, where I will start a school of my own."

HOW TO BE SUCCESSFUL

Have Friend Tell You What Your Most Serious Faults Are and Correct Them.

A million people may read this article. Some have been successes in the battle of life, others haven't. Some will be successes, others won't. It may be too late to save the non-successes; but there is time to rescue a hundred thousand or more of those who, ordinarily, would recruit the army of the unsuccessful.

To them I would say this, speaks a writer in the London Answers: Not one of us is perfect. You may be qualified to do the work which you have to do. You may do it efficiently, but are you even now conscious that there is a something which hinders your progress?

Assuming a reply in the negative, then the chances are a hundred to one that what you need to accelerate your progress and establish your success is a candid friend.

I could set down here the names of three men who are successes in life. It is highly probable that they would have been failures, or but part successes, had it not been for a candid friend. The latter, seeing them day by day, watched their development, and marked the beginning of each fault, each flaw, each idiosyncrasy. These handicap. And the handicap increases as the fault, or whatever it is, develops.

One of the men is a young barrister. He had the brains, the gift of speech, knowledge, and some influence. But he developed a flaw, an idiosyncrasy. How it started he knows not; but in the courts, when pleading, he began to wear a sort of inane smile. His candid friend told him of it, and the smile came off.

A clergyman who to-day is a canon, and will go farther, has several times been rescued by a candid friend. As a curate he developed a trick of sticking his head ludicrously forward and blinking. The candid friend cured him.

Instances could be multiplied, but you see the point?

Select a friend, and invest him with the office of candid friend to yourself. Tell him that you desire him to tell you, with no apologies and no kindly dilution of his criticism, what your faults, developed and developing, are. And then take the medicine and cure yourself.—London Answers.

Japan's Original Name.

The English word "Japan" and the Japanese "Nihon" or "Nippon" are alike corruptions of Yih-pen, the Chinese pronunciation of two characters literally meaning "sun origin;" that is, "the place the sun comes from"—a name given to Japan by the Chinese on account of the position of the archipelago to the east of their own country.

From Chinese Yih-pen, says the East and West News, the Japanese derived the present name Nippon, which was officially adopted, according to the history, in A. D. 670. Before that time the usual native designation of the country was Yamato, properly the name of one of the central provinces. Yamato is the name still preferred in poetry and belles-lettres.

The English name Japan seems to have originated with the Portuguese, who spelled the Chinese Yih-pen Japon, the letter J being silent or similar to H according to their language. This is the way the Spanish and the Portuguese still pronounce Japan. From "Japon" came the English Japan.

On His Way.

A professor had promised to deliver a lecture in London, but owing to the poor train service he found he had very little time to spare if he was to get to the hall in time. On arriving in London all he could find was a "growler."

"Drive as fast as you can!" he shouted to the cabby as he jumped in.

The cabby whipped up his horse and after 10 minutes' furious driving the professor put his head out of the window.

"Do you know where you're driving me?" he asked.

"No," growled the cabby, "but I'm driving as fast as I can."

May Secure Famous Building.

An American educator has been trying to buy, as a Franco-American memorial, a building that few Americans ever heard of, though it has been called the "baptismal font of America." It is the house in Saint Die, on the Meurthe river, about six miles from the old German frontier, in which in 1507 the name America was first put upon the printed page and engraved upon the map. In the same neighborhood soldiers of the first separate American unit wrote the name of their country in their blood.—Youth's Companion.

All Around.

Mary's hair was curly and her mother had allowed it to grow naturally until a few weeks ago, when she sent her to the barber shop to get it cut. She was gone quite a while, and then she came rushing breathlessly home. "Oh, Daddy," she cried in great glee. "Now I have bumps in the back just like them in the front."

Fitting Ornament.

"Lydia has such a nice sense of the appropriate."

"What made you notice it particularly just now?"

"Didn't you see she carried a gun metal bag with her shot silk dress?"—Baltimore American.

NATIONAL COAL STRIKE IMMINENT

Sporadic Walkouts And Threats Of Concerted Action By Union Chiefs Resentful Over Judge Anderson's Edict.

By Telegraph to The Freeman.

Indianapolis, Ind., Nov. 3.—Emerging from beneath the cloud of a threatened nation wide railroad strike into the sunshine of industrial peace for the brief span of a few short days, the nation today was plunged into the shadow of a menace scarcely less serious—the probability of a widespread tie up of coal production.

In this case, however, it is declared, there are no differences between the miners and operators. It is a strike against the decree of Federal Judge Anderson suspending the check off system and prohibiting further efforts to unionize the West Virginia coal field.

Just how broad in scope the impending mine tie-up may grow could not be accurately foretold today.

Taylorville, Ill., Nov. 3.—Thirteen hundred coal miners employed in the Peabody mines here went out on strike today in protest against the Anderson injunction decree. Two mines were closed as a result.

Nelsonville, Ohio, Nov. 3.—That 2,000 coal miners are on strike today in the Hocking Valley district and that the walkout, constituting a protest against Federal Judge Anderson's injunction decree prohibiting the check off system, is spreading, are the claims made here by union miners.

Charleston, W. Va., Nov. 3.—Union miners in West Virginia will await action by the operators before quitting work in protest against Judge Anderson's injunction order abolishing the check off system of collecting miners' dues and assessments, Acting President M. L. Haptonstall said today.

Columbus, Ohio, Nov. 3.—Threat of a state wide strike of miners in Ohio was made here this afternoon by officials of the Ohio United Mine Workers.

Pittsburgh, Penn., Nov. 3.—There will be no walkout of miners in western Pennsylvania until November 12 or 14, it was announced just before noon here today following a secret meeting of President Robert R. Gibbons and other officials of District No. 5, United Mine Workers of America.

Staples a Good Choice.

In renominating Calvin E. Staples for town superintendent of highways, Republicans of the town of Marlborough selected the man who has done a great deal to put the highways of that town in their present excellent state. The highways of Marlborough during the ten years Mr. Staples has occupied the office of town superintendent have become among the best in the county and the growth of traffic among the fruit growers would have been impossible unless the improvement of the roads not only had kept pace with the increasing business but had kept slightly ahead of it. Mr. Staples is one of the most proficient road builders in the Hudson valley.

Back From Diamond Mines.

John G. Baragwanath, a consulting mining engineer, son of the pastor of the St. James Methodist Church in this city, has just returned from a four-months trip to Brazil. At Diamentenia, where is located Brazil's famous diamond mines, he with three assistant engineers had charge of the diamond works for thirty days in order to ascertain their worth. These mines have now been purchased by an American syndicate. Until the discovery of the precious stones in South Africa, South America, specially Brazil, produced most of the diamonds for the markets of the world.

WINS $100 PRIZE BY HER LETTER

Miss Anna Stevens Reed, of Highland, Ulster County, won a $100 prize for the best letter in answer to the question, "What's to be done when one sister falls in love with a man who comes a-wooing the other sister?" The prize was offered by the McCall Magazine and the letter of Miss Reed appears in the November issue of that magazine.

The decision was made known by Winona Wilcox, of the staff of McCalls, that Miss Reed's letter was the best among the hundreds received.

Miss Reed is an old resident of Highland and lives with her sister, Miss Emily Reed, on the New Paltz turnpike. She has done of late years considerable writing of varied character, but has always been decidedly secretive regarding her literary work. She is a member of the Presbyterian Church in Highland and is active in all of the church societies and interests. She is a sister-in-law of Mrs. C. W. Richie, formerly of Highland.

The letter written by Miss Reed which won the $100 prize, follows:

"What's to be done when one sister falls in love with a man who comes a-wooing the other sister?"

It seems to me that the solution of this problem lies with the superfluous member of the trio. If I were so misguided as to fall in love with a man who wanted my sister and not me, on being made entirely sure of that fact, I would stifle the pangs of mortification and renounce all selfish sentiment and be thankful that my brother-in-law would be a man whom I found agreeable.

If not strong enough for this course, I would put a hundred miles between me and those two and proceed to forget them.

Should it not prove possible to leave home, I would adopt a new pursuit. Church work has its attractions; chickens are very absorbing; learning a new language leaves no time to mope, while music will take as many hours as one can give to it and then clamor for more. It is also true that writing for print, and getting it printed, unless there is unusual talent, will provide all the excitement of a lottery without its usefulness.

I want no stolen goods, so it would not occur to me to enter the lists as a rival.

In one way or another I would conquer an affection which would endanger the peace of the sister I love, who has a right to expect such treatment and who would, I am sure, do as much for me if the tables were turned.

ANNA STEVENS REID,

The ambition to be Alaska's first kindergarten teacher has brought Miss Dorothy Troy ten thousand miles from her home in Alaska to fit herself for her chosen work. She has entered the Kindergarten Training School at New York University. Miss Troy is the daughter of John W. Troy, editor of a Juneau, Alaska, newspaper. She was born in the states, but has spent most of her life in the far north. "There isn't a kindergarten in all Alaska," said Miss Troy, "and it is my plan to start the first one there. After I have finished the course I expect to get a year's practical training and then go back to Juneau, where I will start a school of my own."

HOW TO BE SUCCESSFUL

Have Friend Tell You What Your Most Serious Faults Are and Correct Them.

A million people may read this article. Some have been successes in the battle of life, others haven't. Some will be successes, others won't. It may be too late to save the non-successes; but there is time to rescue a hundred thousand or more of those who, ordinarily, would recruit the army of the unsuccessful.

To them I would say this, speaks a writer in the London Answers; Not one of us is perfect. You may be qualified to do the work which you have to do. You may do it efficiently, but are you even now conscious that there is a something which hinders your progress?

Assuming a reply in the negative, then the chances are a hundred to one that what you need to accelerate your progress and establish your success is a candid friend.

I could set down here the names of three men who are successes in life. It is highly probable that they would have been failures, or but part successes, had it not been for a candid friend. The latter, seeing them day by day, watched their development, and marked the beginning of each fault, each flaw, each idiosyncrasy. These handicap. And the handicap increases as the fault, or whatever it is, develops.

One of the men is a young barrister. He had the brains, the gift of speech, knowledge, and some influence. But he developed a flaw, an idiosyncrasy. How it started he knows not; but in the courts, when pleading, he began to wear a sort of inane smile. His candid friend told him of it, and the smile came off.

A clergyman who to-day is a canon, and will go farther, has several times been rescued by a candid friend. As a curate he developed a trick of sticking his head ludicrously forward and blinking. The candid friend cured him.

Instances could be multiplied, but you see the point?

Select a friend, and invest him with the office of candid friend to yourself. Tell him that you desire him to tell you, with no apologies and no kindly dilution of his criticism, what your faults, developed and developing, are. And then take the medicine and cure yourself.—London Answers.

Japan's Original Name.

The English word "Japan" and the Japanese "Nihon" or "Nippon" are alike corruptions of Yih-pen, the Chinese pronunciation of two characters literally meaning "sun origin;" that is, "the place the sun comes from"—a name given to Japan by the Chinese on account of the position of the archipelago to the east of their own country.

From Chinese Yih-pen, says the East and West News, the Japanese derived the present name Nippon, which was officially adopted, according to the history, in A. D. 670. Before that time the usual native designation of the country was Yamato, properly the name of one of the central provinces. Yamato is the name still preferred in poetry and belles-lettres.

The English name Japan seems to have originated with the Portuguese, who spelled the Chinese Yih-pen Japon, the letter J being silent or similar to H according to their language. This is the way the Spanish and the Portuguese still pronounce Japan. From "Japon" came the English Japan.

On His Way.

A professor had promised to deliver a lecture in London, but owing to the poor train service he found he had very little time to spare if he was to get to the hall in time. On arriving in London all he could find was a "growler."

"Drive as fast as you can!" he shouted to the cabby as he jumped in.

The cabby whipped up his horse and after 10 minutes' furious driving the professor put his head out of the window.

"Do you know where you're driving me?" he asked.

"No," growled the cabby, "but I'm driving as fast as I can."

May Secure Famous Building.

An American educator has been trying to buy, as a Franco-American memorial, a building that few Americans ever heard of, though it has been called the "baptismal font of America." It is the house in Saint Die, on the Meurthe river, about six miles from the old German frontier, in which in 1507 the name America was first put upon the printed page and engraved upon the map. In the same neighborhood soldiers of the first separate American unit wrote the name of their country in their blood.—Youth's Companion.

All Around.

Mary's hair was curly and her mother had allowed it to grow naturally until a few weeks ago, when she sent her to the barber shop to get it cut. She was gone quite a while, and then she came rushing breathlessly home. "Oh, Sammy," she cried in great glee. "Now I have bangs in the back just like them in the front!"

Fitting Ornament.

"Lydia has worn a nice sense of the appropriate."

"What made you notice it particularly just now?"

"Didn't you see she carried a cat around lug with her shut with Army?"—Baltimore American.

AVERY SATISFIES HARDENBERGH

The satisfactory service of William E. Avery, of the town of Hardenbergh, during the past four years as a member of the board of supervisors has been evidenced by his renomination by the Republicans of the town, who believe that efficiency and ability should be rewarded.

Mr. Avery is a thorough-going, practical business man who has applied business principles to the work of the county as a member of the county legislature. As chief executive officer of the town he has managed town affairs for the benefit of the taxpayers who have received direct benefit as a result of his careful administration of town matters.

Hardenbergh voters have made a record for themselves in their selection of able men as their representatives in the board of supervisors and their town has reaped the benefit of this wise policy. They are now enjoying the fruit of the labor which Mr. Avery has performed on their behalf and his re-election means a continuation of the policy by which they have benefited.

CHAMPLIN COMP'Y HERE NEXT WEEK

Charles K. Champlin, the popular producer of high class plays at popular prices, will play his annual engagement at the Opera House, starting next Monday, with matinees every day.

Mr. Champlin needs no recommendation to the patrons of the Opera House. Each season he visits this city with a strong aggregation of players and a fine list of plays. Mr. Champlin states that his company this season, he feels, is positively the best that has ever appeared under his management. A 60 foot baggage car full of beautiful scenery and electrical effects are carried by the company.

The list of plays includes "Scandal," one of the hits in New York last season; "Turn to the Right," John Golden's production that gives one the satisfied feeling that few plays on the American stage give; "The Crimson Alibi," the mystery drama full of thrills and love; "The Man Killer" a powerful drama written by Charles K. Champlin; "My Lady Friends," H. H. Frazee's big comedy success; "Sex Against Sex," a play that appeals to all classes of theater goers, and "Johnny Get Your Gun," Johnny Cort's Broadway success.

The company will open with "Turn to the Right," presenting it at both the matinee and evening performances.

The Kingston Co-operative Savings and Loan Association meets Friday night, 7:30 to 9 p. m. Shares are now being issued in the 60th Series. Subscriptions received now. 288 Wall street.—Advertisement.
